The Annual Statistical Abstract for the Madras State for the year 1958-59 has been prepared as in the case of the previous issues of the Abstract, with the co-operation of the departments of State and Central Governments. The Abstract presents some of the important statistics in respect of a wide range of subjects of general interest. These are statistics expected to be of immediate interest to those looking for them and also serve as an introduction to the statistics available on a much larger scale at the various sources. This Abstract covers in the main, the official year 1958-59 (viz. April 1958 to March 1959) but in a few cases the periods relate either to the agricultural or calendar year. For purposes of a comparative study, the figures for the previous year have also been furnished in the Abstract wherever possible.

The statistics of Population etc., furnished in the first ten tables are based on the "Census of India, 1951". The tables in this issue have been compiled according to the availability of data.
